

VectorCare and CSI Aviation Partner to Advance Medical Transport Logistics

SAN FRANCISCO and ALBUQUERQUE, N.M., June 18, 2025 /PRNewswire/ -- [VectorCare](#), a leading provider of patient logistic technology, and [CSI Aviation](#), a globally recognized name in medical flight services, have announced a focused partnership to enhance medical transport coordination. Through an integrated air and ground logistics initiative, the partnership aims to improve patient transport across the United States. This collaboration brings together CSI Aviation's air transport capabilities and VectorCare's advanced logistics platform to deliver a unified solution that improves efficiency, safety, and timeliness in care delivery.

Key features of the integration include real-time aircraft availability, flight tracking, and centralized communication, all accessible within the VectorCare platform. The partnership will initially focus on streamlining interfacility transfers and emergency medical transport, with a regional deployment planned for mid-2025 and a national rollout targeted by the end of the year.

"Partnering with CSI Aviation reflects our commitment to transforming how medical transport is coordinated," said David Emanuel, CEO of VectorCare. "By integrating our logistics platform with CSI's specialized medical aviation, we're improving access, speeding up time-to-care, and equipping healthcare teams with better tools to support patients."

"CSI Aviation is proud to join forces with VectorCare to enhance the speed and reliability of medical transport," said Kelly Dafft, Vice President of Business Development at CSI Aviation. "This partnership leverages our decades of aviation expertise to support healthcare organizations nationwide."

Together, VectorCare and CSI Aviation are bridging critical gaps in medical transport logistics – supporting healthcare teams and delivering improved precision, responsiveness, and coordination to patient care.

About VectorCare

VectorCare is a leading healthcare technology company that provides patient logistics solutions for EMS, fire departments, home health agencies, healthcare systems, and payers. Its platform automates workflows, scheduling, and dispatching to optimize care delivery and improve outcomes for patients. With a focus on leveraging AI and advanced technologies, VectorCare helps healthcare providers streamline operations, reduce costs, and improve quality of care.

About CSI Aviation

Founded in 1979, CSI Aviation is a global aviation services company based in Albuquerque, New Mexico. Specializing in air charter, air ambulance, and medical transport, CSI serves government, corporate, and healthcare clients with a commitment to steadfast safety and reliability.
