**CSI Aviation Now Fully Certified for Medical Flight Services**

***NM Department of Health gives medical certification  
for critical and specialty care transport***

(Albuquerque, NM) CSI Aviation, Inc. is pleased to announce its certification by the New Mexico Department of Health to fly critical and specialty care medical flight missions. CSI's Medical Flight capabilities now provide 24 hours a day, 7 days a week medical transport services for critically ill or injured patients using its B200 and B300 aircraft.

"CSI has arranged medical transport services for years, contracting with various air ambulance operators to support health care providers across the country," said Marc Ramthun, Senior Director - Sales. "Now, we are expanding to provide a more flexible and responsive service capability with our own team and fleet of aircraft."

The King Air B-200 and B-300s are high performance, twin-engine turboprop airplanes with a proven aviation safety record worldwide. CSI's Medical Flight Services aircraft are fully equipped with Spectrum Aeromed Systems that ensures the quality care, safety, and comfort of patients.

CSI Aviation employs a team of highly experienced aviation personnel who have served in all four branches of the US Military and includes combat medics, medevac pilots and flight operations specialists. All flights are crewed by accredited medical personnel specifically trained in patient care and aircraft safety.

"We coordinate directly with health care providers, hospitals and insurance companies, throughout the entire transportation process, to ensure a seamless transfer of patients and their families" said Ramthun. "Our attention to detail and commitment to customer service is what sets us apart from other companies."

Program Director John Houston added “the company’s unwavering commitment to aviation and patient safety is way above the norm for any of the air ambulance operators I’ve seen in my 26 years of working in this field.”

### **About CSI Aviation**

Established in 1979, CSI Aviation, Inc. (CSI) has grown into a global aviation company providing diverse and complex solutions to commercial, group and private individuals, and government customers. CSI fills a unique niche in the aviation industry – solving complex aviation requirements for air charter services, aviation logistics, and program management. CSI Aviation also holds FAR Part 135 Air Carrier operating authority and provides air charter, aircraft purchase, leasing and maintenance support.
