

Seeker Aircraft Visits Romania

May 26, 2022

This past week, CSI Aviation Inc. leadership represented our subsidiary company, Seeker Aircraft, at the Black Sea Defense and Aerospace Exposition in Bucharest, Romania. The Seeker is a FAA Part 23 Normal Category Certified light purpose-built aircraft uniquely designed for expeditionary aerial observation and surveillance missions for commercial operations.

Pictured below is CEO Allen Weh with the Indonesian Ambassador to Romania, Muhammad Amhar

Azeth, demonstrating Seeker's capacity to provide a cost-effective, and reliable platform to monitor and detect advanced warning signs for forest fires across Indonesia, the prevention of which is a major initiative in Indonesia's ongoing effort to fight pollution and climate change.

Seeker Aircraft along with CSI Aviation would like to extend its appreciation to STIMPEX for hosting us at this year's

Black Sea Defense and Aerospace Expo in Bucharest, Romania. Specifically, Seeker Aircraft would like to thank Cornel Dima, and Vlad Istrate (pictured below with Seeker Aircraft CEO Alen Weh). Their support and cooperation proved invaluable, and we look forward to partnering together in the future.
